## About This Content

### Soviet Union 1943

The war on the Eastern Front continues! Following the stunning reversal at Stalingrad, the Wehrmacht seeks to regain the initiative in the East with fierce counterattacks lead by brand new Panther and Tiger tanks! Take command of your forces once again to crush the Soviet winter offensive and prepare to engage in the largest tank battle in the history of the world at Kursk!

This DLC features 13 all new scenarios, extra large maps that recreate epic engagements, unique objectives such as escorting damaged units to safety and headhunter operations, and the capacity to save your core force for use in future campaigns!

The Grand Campaigns are a series of expansions for Panzer Corps and require Panzer Corps. Each campaign can be started with the core force from the previous Grand Campaign, so you can continue all Grand Campaign expansions carrying over all the core forces that completed the previous ones. Alternatively players can start with a preset core force and play each campaign on its own, or jump in to the Grand Campaign at any year.

10V10. This is a great example of a VR game done well. The story and voice acting is engaging, and the controls are done well so I wasn't frustrated trying to grab or hold things while teleporting around the rooms. The puzzles could be a little more difficult, but overall the game made you think about your next move and how you are going to achieve it. Overall, I think for what the game is, the price is a little steep. I was able to complete it in about an hour and normally equate my game purchase satisfaction to the price of a movie ticket. If I can enjoy myself for a couple of hours, it was worth it. In this case, I was left wanting more but I am satisfied with the thought that I am able to support a development team that knows what to do when it comes to VR gaming.. To be fair, this should be a positive review. The game looks great and is a good implementation of the real board game. The only thing missing are more expansions.

The reason why I still have to rate it negative for me personally though is, that you can't see your next tile. I know the official rules state that you only draw your tile at the beginning of your turn, but for me it makes the game nearly unplayable. It just highlights all the bad parts. You're not engaged in the turn of your opponent, but you can't think about your turn yet either.

Because of that each and every turn takes longer and is even more boring.

When we get a variant where you can see your next tile, I'll play this over the board game. Until then I'd rather play the board game though. it wouldn't even let me play it

. gooooooooooooooooood game

play it like a BOSS !!. Almost voted thumb down. This game plays like RPG from 20 plus years ago; very bare boned. There is no load game function, the only thing you can do is to quit out and then continue. There is no tutorial and inventory is tiny, just like RPG on old Nintendo games. However it does the RPG part very well. There are 9 races and 16 classes; you can multi class on top of that. It's a niche game, for hard core RPG players.

Boomer shooter with demon thiccums. recommend only at sale, about 80 to 90% off.

slybots is better in every way! there are also free games like this, that is also better!. Boo I don't want to register to something shady.. Ok, this is a good game, so: thumps up!

However, if this is your first "Strategic Command" game, go for "War in Europe" first.

The game balance on that one is slightly better. The world map has a larger scale, so the Russian invasion really becomes the desperate struggle it was in history.

But make no mistake: both Strategic Command games are new classics in turn based gaming, because they strike the perfect balance between complexity and game play simplicity.

The AI especially is impressively competent.. Its♥♥♥♥. Another very simple toilet game ported to pc and game is't even good, definitely not worth 5€, you can easily find better free flash games than this.

In mobile version you can buy orbs to upgrade your bird but in pc version you have to grind easier level to do so, I don't believe developer changed how much orbs you need to upgrade on pc version and it is the same as free mobile game where main goal is to sell upgrades or force player to grind and grind until he is dead just like this version. I will pass.

sooo no
